Profile: Computer Engineer and former startup technology leader with experience building and scaling full-stack products, leading developers, defining product strategy, and connecting engineering with sales, logistics, operations, and finance.

Experience

Technology Leader

Jun. 2023 – Feb. 2024

BeUni – Corporate Gifting Platform

Brazil

- Led the engineering team, balancing new product delivery, technical maintenance, and business priorities.
- Built and scaled a platform that supported thousands of purchases and deliveries per month.
- Developed full-stack services with TypeScript, React/Next.js, Node.js/NestJS, PostgreSQL, MongoDB, Redis, AWS, and Docker.
- Implemented CI/CD pipelines and an API gateway, improving release speed and client integrations.
- Partnered with sales, logistics, accounting, and key clients to translate operational needs into product features.
- Prototyped AI solutions using RAG and validated business hypotheses with n8n and Airtable before full development.

Co-founder & CPO

Oct. 2019 – May 2023

BeUni – University Marketplace Platform – Pre-Pivot Product

Brazil

- Built and administered BeUni's first MVP with open-source software, launching branded marketplaces for seven public universities, including USP, Unicamp and UNESP
- Owned the platform end to end: storefront setup, product catalogs, checkout, payments, orders, and operational administration.
- Replaced manual, cash-based campus sales with a pre-pandemic web/mobile experience for online purchasing and home delivery.
- Expanded the product through a contract with Universidade Presbiteriana Mackenzie, delivering nationwide shipping and multiple payment methods before leading the transition to corporate gifting.

Data Enrichment Project

Feb. 2019

Endeavor

São Paulo, Brazil

- Used JavaScript, Google Sheets, and APIs to consolidate 45,000 scattered entrepreneur records into a centralized database of 16,000 entries, including approximately 4,000 potential leads.
- Improved access to entrepreneur data and enabled lead mapping for programs involving corporate and venture-capital partners.

Education

Universidade de São Paulo – USP

Mar. 2017 – Jun. 2026

BSc in Computer Engineering

São Carlos, Brazil

- Selective, full-time 10-semester program jointly offered by EESC-USP and ICMC-USP, combining rigorous training in software, hardware, electronics, computer systems, artificial intelligence, and engineering with practical experience in cloud platforms, embedded systems, robotics, data, and product development.

Awards, Funding & Recognition

1st Place | Maratona Nação USP Empreendedora

2019

- Co-founded UniStore, the project that later became BeUni, and led technology and product development for its marketplace MVP.
- Ranked first among 68 projects and 207 participants with a solution that digitized university merchandise sales; received a R\$10,000 award and was selected for implementation at USP.

Winner | Hotmart Challenge – Startup Edition

2021

- Won a national competition with more than 600 startup applicants, culminating in a R\$7 million acquisition proposal from Hotmart based on BeUni's strategic fit with the creator economy.

Seed Funding | Investidores.vc, FEA Angels, EquityRio & SdP Capital

2023

- During my tenure, BeUni raised R\$1.7 million in its initial round, later completed at R\$2.5 million, to expand its technology, product portfolio, and team.

Skills & Languages

Technical Skills: JavaScript, TypeScript, Python, React, Next.js, Node.js, NestJS, PostgreSQL, MongoDB, Redis, AWS, Docker, CI/CD, REST APIs, RAG, n8n, Airtable, Git.

Leadership & Product: Engineering leadership, product strategy, people and project management, UI/UX, Scrum, Kanban, Lean Startup, stakeholder management.

Languages: Portuguese (native), English (C1 – TOEFL ITP; professional proficiency), Spanish (intermediate).
